Makati City, 1229

Professional Summary

BSIT graduate and Junior Full-Stack developer with hands-on experience building web applications, REST APIs, administrative platforms, and database-driven systems using React, Django, PostgreSQL, and JavaScript. Experienced in translating stakeholder requirements into functional features, working across frontend, backend, database layers, and delivering maintainable software solutions for real organization needs.

Education

Romblon State University

August 2022 to June 2026

Bachelor of Science in Information Technology

GWA: 1.80 (1.00 highest)

- Young Researcher of the College Award | 2026
- CCMADI SIKLAB Research Competition 3rd Place | 2025
- CodeChum National Programming Challenge Participant | 2024

Experience

Full-Stack Developer Intern | Asia Pacific College

February 2026 to May 2026

- Developed a full-stack academic web platform using Django, Wagtail CMS, PostgreSQL, JavaScript, Tailwind CSS, and Docker.
- Built database-driven content features, administrative workflows, and CMS functionality based on operational requirements from the ITRO team.
- Collaborated with stakeholders to translate business and content requirements into functional system features and resolve development issues during implementation.
- Contributed to a platform that successfully completed stakeholder review and was approved for production and formal turnover.

Projects

Capstone Project | SVConnect System

August 2025 to December 2025

- Developed a mobile application and web-based administrative dashboard for St. Vincent Cooperative in Romblon to manage loan applications, savings records, transaction history, announcements, and member services.
- Implemented secure authentication, account management, and centralized administrative workflows for cooperative operations.

- Developed digital workflows to replace manual cooperative processes and improve access to member services.
- Collaborated directly with stakeholders to gather requirements, translate operational needs into functional features, and refine the system based on feedback; the project was approved for formal turnover following stakeholder evaluation.

Investment Management System | Personal Project

July 2026

- Developed a full-stack investment management system using Django REST Framework, React, TypeScript, PostgreSQL, and Tailwind CSS.
- Implemented transaction processing, order management, and portfolio tracking for investment records.
- Implemented SQL reporting, audit logging, data validation, and CSV import workflows with structured error handling.
- Integrated frontend functionality with REST APIs to support database-driven investment operations.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Django, Django REST Framework, Node.js

Databases: PostgreSQL, MySQL

APIs & Integration: Rest APIs, API integration

Tools & Platforms: Git, GitHub, Docker, Firebase, Wagtail CMS

Development Practices: Data Validation, Authentication & Authorization, ETL/Data Import Workflows
